

INTRODUCTION

The ancient sages proclaimed the transcendental knowledge attained from mystical realms in different scriptures. Every scripture reveals that the soul of light is beyond the fetters of birth and death.

The soul of light continuously assumes different physical forms to expiate past karmic debts. This karmic balance remains unknown to us as we endlessly plod on through the daily trails of materialism. Death inevitably follows birth and for most of us it is the final end, marking a cessation of all activities in this life.

The spiritual domain upholds the lofty philosophy of the scriptures. It axiomatically proclaims that actions are not binding. It is our inadvertent attachment to the results of actions that bind us in feelings of joy and sorrow.

Yet, a vast majority seeks materialistic knowledge, which will enhance their name and fame. This knowledge does not always yield those positive results which are desired. This knowledge does not usually assist a soul of light in its evolutionary progress.

The angst ridden humanity flounders, confused about which path to follow. The familiar worldly path inevitably beckons; yet it portrays a seesaw of duality allowing us to experience brief glimpses of joy amongst the lingering traces of sorrow.

The worldly path lures our senses to the enchanting glamour of the external world. By contrast, the wisdom of the sacrosanct scriptures is shrouded in ambiguity. Yet, they are imbued with a spiritual potency, which unerringly takes us towards the Supreme Goal.

The trilogy series of *Karmic City* introduces to you, the four levels of consciousness. This unique portrayal of the different levels has the capacity to enhance the spiritual illumination of an aspiring seeker. This knowledge seeks to uncover the latent wisdom inherent in us that remains unknown.

The main character in the *Karmic City* has been portrayed as an ageless and nameless entity called the *Soul*. It is my sincere wish that those readers who find they are sharing an empathy with the personality of the *Soul* could strive to emulate him and revivify their life.

I wish to inspire everyone to seek the domain of spirituality. The story in this book depicts people whom you can easily relate to. You may often find that you are reading about yourself.
